

Raptor® Tank Cleaning Services

We Handle Any Amount & Type of Heel

Economical

Cleans in hours, allowing return of railcars within days

Efficient

Utilizes robotics to remove heel for complete cleaning

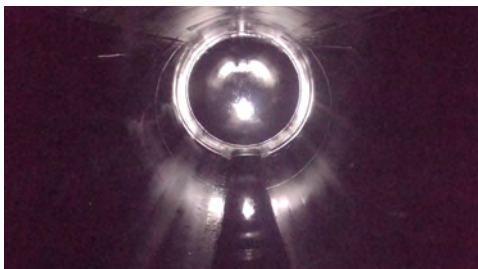

Safe

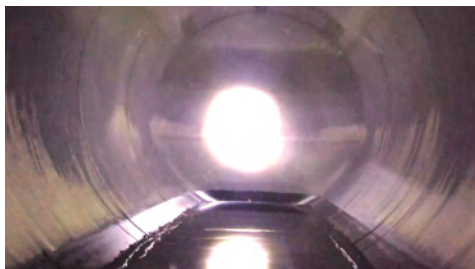

No human entry / No damage to railcars

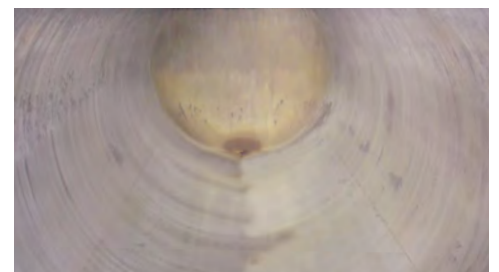

ASPHALT

ACID

VEGETABLE OIL

We remove liquids, solids and sludge in all types of Hazardous, Non-Hazardous and Feedstock materials including: Acid, Asphalt, Crude Oil, Ethanol, Vegetable Oil, Animal Fats and Tallow.

We use a Raptor[®] Tank Cleaning System – the safest system
Use of BOV ensures proper containerization of heel and cleaning solution
Raptor[®] can remove any amount of heel.

Sustainable Options

Utilize tank's original liquid as the cleaning solution – minimizing cleaning residuals and waste thus reducing disposal costs, concerns and liabilities

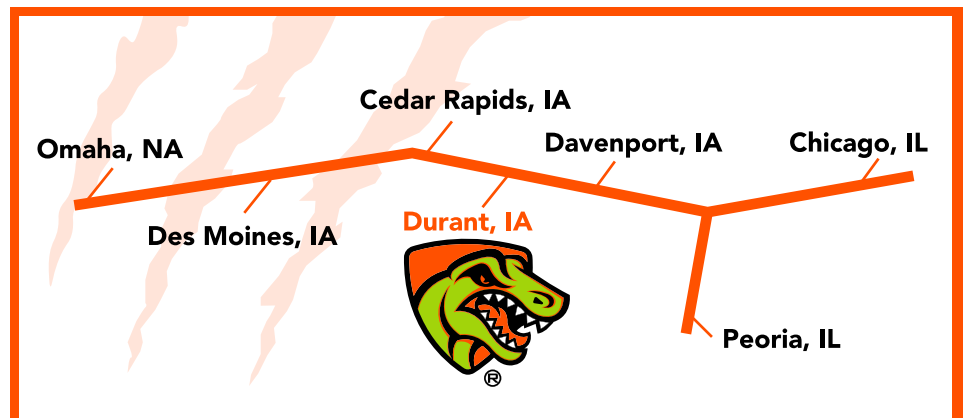

State of the art in-line filtering system is ideal for reclaim / re-use / recycling of numerous products including Crude Vegetable Oils, Animal Fats, Cooking Oils

Safe

No Human Entry
No Damage to Railcar
