

Raptor[®] Tank Cleaning Services

We Remove Any Amount & Type of Heel

Economical

Cleans in hours, allowing return of railcars within days

Efficient

Utilizes robotics to remove heel for complete cleaning

Safe

No human entry / No damage to railcars

We remove liquids, solids and sludge in all types of Hazardous, Non-Hazardous and Feedstock materials, including: Acid, Asphalt, Crude Oil, Ethanol, Vegetable Oil, Animal Fats and Tallow.

ASPHALT

ACID

VEGETABLE OIL

We use the

Raptor® Tank Cleaning System

the safest, most effective, & efficient system

- Use of BOV ensures proper containerization of heel and cleaning solution.
- Raptor® can remove any amount of heel.

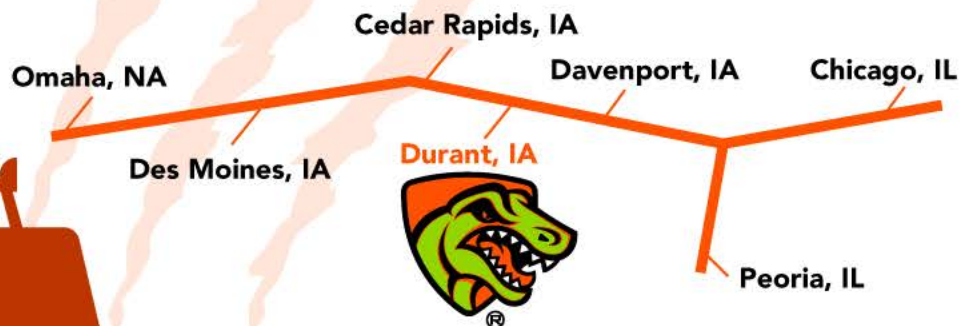

Sustainable Options

Utilize tank's original liquid as the cleaning solution – minimizing cleaning residuals and waste thus reducing disposal costs, concerns and liabilities

State of the art in-line filtering system is ideal for reclaim / re-use / recycling of numerous products including Crude Vegetable Oils, Animal Fats, Cooking Oils
